Objective

B.Tech Artificial Intelligence and Machine Learning student at DRK Institute of Science and Technology with hands-on experience in Machine Learning, Data Analytics, and Python-based projects. Interested in building practical AI/ML solutions, analyzing data, and developing software applications while continuously strengthening technical and problem-solving skills.

Education

B.Tech in Artificial Intelligence & Machine Learning **2023 – 2027**
DRK Institute of Science and Technology, JNTUH

Intermediate / 12th **2023**
Sri Chaitanya Junior Kalasala, TSBIE
Percentage: 73.2%

SSC / 10th **2021**
Sri Chaitanya School, SSC Telangana
CGPA: 10.0

Skills

- **Programming:** C , C++, Python, Java
- **Data Analysis:** Pandas, NumPy, Excel, Power BI, Tableau
- **Machine Learning:** Linear Regression, Logistic Regression, Decision Trees
- **Deep Learning & AI:** Neural Networks, CNN, NLP, LLMs
- **Databases:** SQL, MySQL
- **Visualization:** Matplotlib, Power BI, Tableau
- **Frameworks & Libraries:** Scikit-learn, TensorFlow
- **Tools & Cloud:** VS Code, Git, GitHub, AWS, Microsoft Azure

Experience

Prodigy InfoTech — Machine Learning Intern **Aug 2025**

- Worked on Machine Learning tasks involving data preprocessing, cleaning, exploratory data analysis, visualization, feature engineering, model implementation, training, and evaluation.
- Used Python, Pandas, NumPy, Matplotlib, Seaborn, and Scikit-learn for practical Machine Learning workflows.
- Completed projects including House Prices – Advanced Regression, Mall Customer Segmentation, and SVM – Dogs vs Cats Classification.

Projects

Customer Segmentation using K-Means Clustering GitHub

- Grouped retail customers based on annual income and spending behavior for customer segmentation and targeted marketing.
- Performed data preprocessing, EDA, feature selection, feature scaling, clustering, visualization, and result analysis.
- Used K-Means Clustering with the Elbow Method.
- **Technologies:** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn.

House Prices Prediction Using Machine Learning GitHub

- Developed a Machine Learning solution to predict house prices using relevant property features.
- Performed data preparation, cleaning, preprocessing, EDA, feature engineering, feature selection, visualization, and model comparison.
- Implemented Linear Regression, Random Forest Regression, Decision Tree Regression, and XGBoost.
- **Technologies:** Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, Jupyter / Google Colab.

Certifications

- **Prodigy InfoTech – Certificate of Completion** Aug 1 – Aug 31, 2025
  Certificate Link
- **Cisco Networking Academy – Completion of AI Fundamentals with IBM SkillsBuild** Apr 13, 2025
  Certificate Link
- **Kitech – Certificate of Course Completion** 4 Months
  Certificate Link
- **CodSoft – Certificate of Course Completion** May 25 – Jun 25, 2026
  Certificate Link
